Address: 19 Kidderminster Road, Slough, SL2 2AZ

Visa: UK Work Permit

I'm an aspiring Frontend Developer with a passion for creating user-friendly digital experiences and a clear goal of growing into a confident Full-Stack Developer. While studying Software Engineering at university and completing a professional coding bootcamp, I'm actively building my skills and gaining hands-on experience. Coding, for me, is a path of creativity, growth, and impact. I'm excited to contribute to meaningful projects and become a skilled developer who delivers real value to users and businesses.

PROFESSIONAL EXPERIENCE

Front-End Developer (Personal Projects), Remote   *January 2024 – Present*

- Delivered 7+ projects (games + landing pages) using HTML, CSS, JS, jQuery, Bootstrap, currently in my portfolio for demos.
- Built game mechanics (sequence/state/timing) and keyboard/touch controls; added sound using the HTML5 Audio API and polished micro-interactions.
- Implemented UI behaviors: smooth-scroll nav + menu toggle, Slick Carousel, MixItUp filtering, Fancybox lightbox, and reusable components.
- Delivered mobile-first, pixel-accurate UIs from Figma, responsive from 320–1920px; deployed to GitHub Pages.
- Improved performance with image compression & lazy-loading, fast first-load and smooth animations.
- Worked with Git/GitHub (branching, PRs) and tracked tasks in Trello and Notion.

Way To Save Food & Wine Ltd - Shop Consultant, Slough, Berkshire   *June 2024 — May 2025*

- Managed digital pricing and inventory tools to update product labels and align stock levels with discounts
- Analyzed daily sales reports in Notion; presented key insights to management that informed promotional scheduling
- Resolved customer inquiries, often under time pressure - handling refunds, exchanges and product recommendations with a 95% satisfaction rate
- Assisted in simple financial record-keeping (daily sales, returns) and communicated variance reports to supervisors

PROJECTS

My Web Portfolio | **Live site** | **Repository**

Portfolio of mini web games and responsive sites. Tech: HTML5, CSS/Bootstrap, JavaScript/jQuery, EJS & sessions - mobile-first, accessible, and performant (live demos & repos linked).
